SYST24444

Project Examples

1. Course Comparison System(CCS):

The project should compare the details of courses on the basis of following criteria:

A student should be able to enter the relevant name of course and

1. Course Duration
2. Course Fee
3. University course
4. College course
5. Weekdays/weekend

2.E-shopping Portal(Auto, Electronics, Furniture, Appliances)

Create an E-Shopping portal that provides the details of product on the basis of entered criteria. For example, if you choose product as used car, it should provide you the information on the basis of following criteria:

1. Name of Make
2. Name of Model
3. Year of make
4. Range of price
5. Range of KM.

3. Toronto Recreation Centre(TRC)

Toronto recreation Centre provides various recreation facilities to children, adults and senior citizens. The web site provides the complete details of the various activities and secures registration facility. There are special discounts to the regular/returned customers.

4. Toronto Student Housing Accommodation(TSHA):

TSHA takes housing requirements from the students and provide them with the best available housing options. The input taken from user may be location, type of house, rent, etc.

5. Toronto Tourism Information System(TTIS)

Select at least four tourist places in Toronto and provide the complete details about every place. The details may include

1. Location
2. Plan
3. Commuting facilities
4. Stay
5. App cost(day/week)
6. Eat and drink
7. Sports/adventures
8. Contact

6. **Green Flyers**

   A web site that provides the information on all the flyers pertaining to certain class of goods (furniture, auto, electronics, housing material, grocery). It should also provide a comparative study on the list prices so that it could help the consumers to a great extent.
